Am
 config the topology
 then learning hosts then config the router and
 end devices

Topology

gateway: 10.0.0.1

gateway: 20.0.0.1

set the gateway & IP address to each of
 the end device

To config the router:

- Router > enable
- Router ~~config~~ # config terminal
- Router (config) # interface fastethernet 0/0
- Router (config if) # ip address 10.0.0.1 255.0.0.0
- Router (config if) # no shutdown

Repeat for other end devices

For PC1:

- Router (config) # interface fastethernet 1/0
- Router (config if) # ip address 20.0.0.1
- Router (config if) # no shutdown

* once router is configured, send a simple
 PDU

* No network is ready.
